

TATA Super Ace Ex2

Building your business
1 ton at a time

Super power & efficiency

The Tata Super Ace Ex2 is powered by a 4-cylinder turbocharged intercooled 1405cc diesel engine, giving you high fuel efficiency, low operating costs and enhanced performance – which means a better bottom line for your business.

The 2630mm x 1460mm load body delivers a 1 ton payload capacity with best-in-class load deck, 3-way dropside and a low loading height, making it easy and efficient to load, carry and offload large loads.

Super customisable & comfortable

Whatever business you're in, the Tata Super Ace Ex2 can be customised to your needs with accessories like canopies, plumber rails, and more.

As a dedicated business vehicle, performance is vital but so too is comfort and the Tata Super Ace Ex2 doesn't disappoint with electric windows, a Heater Ventilator Air-Conditioner (HVAC) system and sliding and reclining seats with adjustable headrests.

Super driving experience

The Tata Super Ace Ex2 boasts a narrow 5.1m turning radius and power steering, giving you the freedom and manoeuvring flexibility to navigate narrow roads, busy streets and sharp corners with ease.

Additional driving style features include a digital clock, sleek dials, cup holders, a power socket and a refined external appearance.

Super safety

Safe driving is at a premium with the Tata Super Ace Ex2, and active and passive safety features are standard, along with enhanced security measures for your vehicle and your valuables.
